

Health

Master of Arts (MA)

The Graduate Program in Health is an exciting learning environment that focuses on real-world and applied research questions related to health. It is theoretically informed and research-based. The program examines the effects of health systems, services, issues, laws, policies, practices, norms, organizations, and decision-making on health outcomes that are often inequitable. The program emphasizes how societal, economic, political, organizational, and cultural processes influence health. Our comprehensive curriculum incorporates the School's perspectives on health policy and equity, health management and health informatics.
