Course Description

This course looks at the field of counselling and psychotherapy from 3 perspectives: conceptual framework, intervention strategies, and the therapist's standpoint (role in creating change, personal attributes, attitudes, skills). Both traditional and emerging approaches will be covered. Additionally, an entire class will be devoted to the research issues specific to this field.

The grading scheme of this course aims to create an opportunity for deeper study, thus there is no one all-encompassing exam and class work is distributed throughout the course. There is an assignment for every class, regular journal entries, 4 mini-exams, a presentation and a paper.

Program Learning Outcomes

Upon completion of this course, students should be able to:
