

Concentration in Aging and Late Life Development

The goal of this Concentration is to provide students with training in the psychology of aging and late life development. Humans are living an average of three decades longer than they did only a century ago. This creates enormous opportunities for psychology trainees to shape our understanding of 'old age'. The Concentration will take a 'brain to society' approach, exposing students to the personal, professional, and policy-level challenges and opportunities that accompany this unprecedented demographic shift. At program completion students will have deep knowledge of the aging process, from brain and cognitive changes to the psychological and mental health aspects of late life development. This course of study is intended to provide students with tools, skills and knowledge that will prepare them for careers or graduate studies in aging related fields including: advocacy work on behalf of older adults; developing life-long learning programs; innovating resources for caregivers; and designing interventions help older adults live healthier, longer.

Name: _____ Student Number: _____

Students will be required to complete a minimum of 18.0 credits from the courses listed below. The minimum average GPA across all courses counting towards the Concentration is a C+.

Concentration Requirements	Completed	Grade
2000-Level Courses		
HH/PSYC 2110 3.00 - Developmental Psychology		
HH/PSYC 2240 3.00 - Biological Basis of Behaviour		
HH/PSYC 2260 3.00 - Cognition		
3000-Level Courses		
HH/PSYC 3265 3.00 - Memory		
HH/PSYC 3490 3.00 - Adult Development & Aging		
HH/PSYC 3495 3.00 - Neuroscience of Aging & Cognitive Health		
HH/PSYC 3560 3.00 - Psychology of Death and Dying		
4000-Level Courses		
HH/PSYC 4006 3.00 - Part I: Healthy Aging Current Trends and Issues		
HH/PSYC 4007 3.00 - Part II: Healthy Aging Community-Service Learning Project		
HH/PSYC 4270 3.00 - Seminar in Memory & Cognition		
Total number of credits completed:	0.00
