

Concentration in Neuropsychology

The goal of this Concentration is to provide students with additional training in experimental and clinical neuropsychology. Students will gain in-depth knowledge in neuropsychological conditions, rehabilitation approaches, experimental neuropsychology and in the biological basis of behaviour. At program completion, the students will have deep knowledge of brain-behaviour relations and knowledge of how it is applied in the context of assessment, diagnosis and rehabilitation. This course of study is intended to provide students with tools, skills and knowledge that will prepare them for careers in clinically related fields or for graduate studies in clinical neuropsychology or related disciplines.

Name: _____ Student Number: _____

Students will be required to complete a minimum of 18.0 credits from the courses listed below. Note that PSYC 2240, PSYC 2260, PSYC 3140, and PSYC 3250 are required. The minimum average GPA across all courses counting towards the Concentration is a C+.

Concentration Requirements	Completed	Grade
2000-Level Courses		
HH/PSYC 2240 3.00 - Biological Basis of Behaviour		
HH/PSYC 2260 3.00 - Cognition		
3000-Level Courses		
HH/PSYC 3140 3.00 - Psychological Health, Distress, & Impairment		
HH/PSYC 3250 3.00 - Neural Basis of Behavior		
Plus, at least 6 credits from:		
HH/PSYC 3495 3.00 - Neuroscience of Aging and Cognitive Health		
HH/PSYC 3590 3.00 - Drugs and Behavior		
HH/PSYC 4080 6.00 - Neuropsychology of Abnormal Behavior		
HH/PSYC 4215 3.00 - Neuroimaging of Cognition fMRI methods		
HH/PSYC 4270 3.00 - Seminar in Memory and Cognition		
Total number of credits completed:	0.00
