

Are you interested in Research in the Canadian North?

Take advantage of this funding opportunity offered by the *Canadian Polar Commission* called **the Northern Scientific Training Program**. It is designed to support students interested in solving the pressing environmental, health, cultural, socio-economic, political, educational, legal, engineering or resource development challenges facing the Arctic and its peoples.

This program makes it possible for students to address these issues by providing supplementary funding to cover expenses associated with northern travel, accommodations, freight and translators/interpreters. Over **300 York University** graduate and undergraduate students have gained experience conducting research in Canada's North through the NSTP.

You are eligible for NSTP funding if you are a Canadian citizen or landed immigrant and will be undertaking thesis research (BA/BSC, MA/MSC/MES or PhD) in the North in 2016 and have a York University supervisor.

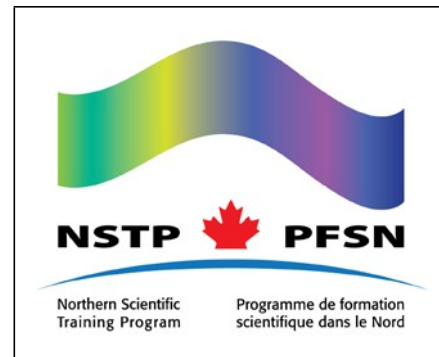

Learn more about the NSTP program:

<http://www.polarcom.gc.ca/eng/content/northern-scientific-training-program>.

Apply online with your faculty advisor from York University:

<http://www.polarcom.gc.ca/node/199>

York University internal application deadline:

Friday November 20th, 2015

Applications from York University students' are collected, adjudicated and then forwarded to the Canadian Polar Commission by the *Borealis Council at the Robarts Centre for Canadian Studies*. Awards announced April 2016. For more details: robarts@yorku.ca or <http://www.yorku.ca/northern>
