2024/25 Research Security Project

Project Title	Output (investment of research security funds)	Performance objective	Performance indicator	Target outcome	Reported outcome
Research Security	$360,299 invested in research security	Additional resourcing for university-wide research security supports; continued awareness building to identify and mitigate research security risks, continued identification of vulnerabilities within the York ecosystem with immediate and meaningful mitigation.	Number of personnel dedicated to research security; number of policies, procedures and recommendations issued that address research security vulnerabilities; number and value of research proposals reviewed by Research Security personnel; percentage of proposals flagged as 'high risk' by granting agencies.	Fewer high-risk partnerships existing within York University and fewer 'high risk' assessments on grant applications submitted by York researchers.
