

AGING IN THE CITY SEMINAR WITH DR. GRACE LIU & DR. SANDER L. HITZIG

Patient Navigation Services for Older Adults with Complex Care Needs- Implications, Consideration and Outcomes

Dr. Grace Liu has worked as a Physiotherapist, Case Manager, Research Analyst and Policy Analyst in various healthcare settings in Ontario, Canada. She has completed her BSc. Physiotherapy, MBA, and PhD in Health Policy and Equity. Her research is on health system transformation through cross-sectoral collaboration and integration. Grace is interested in developing innovative and sustainable strategies to improve the healthcare delivery system and patient experience.

Dr. Sander Hitzig research focus is on examining issues associated with aging with a disability, assessing the impact of primary impairments and secondary health conditions on quality of life, and identifying factors that promote health and well-being in the community.

Dr. Hitzig interests include understanding the role of social networks on health and quality of life outcomes following disability, developing and validating patient-reported outcomes, and evaluating novel technologies and clinical services designed to enhance community living.
